

Redbird AATD Quick Shutdown Guide

1. End the flight if one is currently running.

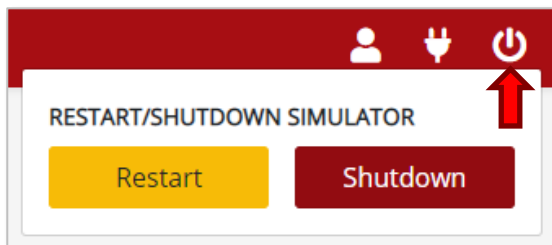

Through Navigator

Or on the Switch Panel

2. Click the Power Symbol in the top right corner of the UI, select **SHUTDOWN** and enter the password (if prompted).

3. Turn off the Motion Platform *(if installed)*

4. Ensure the computer has fully powered off (fans quiet)

5. Turn off the Surge Protector

6. Turn off the Power converter *(if installed)*
